- Commercial Cleaning
- Corporate Cleaning

## Carpet Cleaning Townsville

Has your **carpet** seen better days? Was there a time when you knew your carpet's original colour? A time before years of foot traffic, both of the big human, little human, dog and cat kind, gave it a kind-of brown-ish tint and sticky texture? How about a time when the feeling of walking bare foot through your carpet, scrunching it up in your toes a'la John McClane, was a luxurious feeling causing you to sigh in pleasure, rather than one that required you to wash your feet with soap?

Vacuuming only does so much; at some time the only way to bring carpet back to its original lustre is by a **full cleaning service**.

Most people dread **carpet cleaning**; it takes a lot of time and effort and know-how. But that is where we come in. At **BPM Carpet Cleaning Townsville**, we are fully capable to assist in your carpet cleaning needs, and experienced and skilful enough to bring your carpets back to their prime, toe-scrunching luxuriousness.

And our services aren't just limited to the **home**, but to your places of **business** as well, whether they be a busy **office** trampled by the shoes of dozens of hardworking workers every day, or a popular **hotel** filled by vacationing tourists.

## About Us

We're a local company, located in **Townsville**, Queensland, the largest city north of the Sunshine Coast – the unofficial capital of North Queensland; and we take pride in our great city and its people. We offer a large range of solutions not just limited to carpet cleaning, but also:

- Upholstery cleaning
- Rug Cleaning
- Mattress Cleaning
- Tile and Grout Cleaning
- Stains and Odour Removal
- And also Commercial and Corporate Cleaning Services

Townsville is a great city, full of vibrant people who love life, love North Queensland, and love our city. At BPM Carpet Cleaning Townsville we care about our city as much as you do, and so we ensure our team uses cleaning products that are both friendly to the environment and safe for your family, whether they be of the two-legged or four-legged kind.

## Why Do I Need To Clean My Carpets?

Your carpets come under a lot of stress. All day, every day, people are walking on them, wearing them down with dirty shoes and dirty feet. **Pets** shed hair on them, or bring in dirt from outside on their paws, or even just pee on them.

And kids? Well, anyone who's had kids, carpet, drink and food in close proximity to each other knows exactly where the drink and food will end up if they are left

unsupervised.

All of this wear and tear adds up. Your carpet, once a beautiful bold colour that added much to the look of the house, because an embarrassment; a dull, lifeless, gritty thing you try and divert attention away from when visitors come over.

Having the carpet cleaned by **professional carpet cleaners** like us will have your carpets back to their former glory.

Now, you may say, 'Well, I'll just vacuum regularly. I don't need to get the carpet cleaned if I vacuum every few days, do I?'

Well, vacuuming is definitely important. But **vacuuming doesn't get deep** into the carpet. It might get rid of the surface layer of dust, dirt, and bacteria, but *only* the surface layer. Deep within the forest of your carpet, right down at the ground layer, the dust, dirt and bacteria remain, and things like dust mites and bedbugs find their home. Vacuuming only gets the stuff at the top of the forest, but only a **thorough carpet clean** can really get right down to the forest floor.

## What Are The Health Benefits For Cleaning Carpets?

Carpets can get pretty grotty. Walking on dusty, dirty, bacteria-infused carpets releases some of that dust, dirt and bacteria into the air. The build up of all these particles in the air can give people with lower immunity, and those with pre-existing health issues, **breathing problems** like asthma and allergic attacks.

Children and our older generation are more prone to these types of attacks. The longer you put off cleaning your carpet, the worse these problems will become.

## How Often Should I Get Someone In To Clean My Carpets?

The answer to this is: it depends, but probably more often than you currently have them cleaned.

If you are single and live the quiet life with no pets, no raging parties and you are methodical in ensuring the outdoors stays outside and not on the bottom of your shoes as you come inside, than a **yearly clean** should be sufficient.

This might change to more frequently, like every **six or nine months**, if you smoke, or if you have pets or children.

However, if you have all three – you smoke, you have kids and you have pets – think **every three months** ... particularly if your carpet is in your high-traffic area, such as coming in from outside or from the garage.

## Carpet Cleaning

Not all carpets are created equal. Some are tough; they can take a beating and come out the other side still in tip-top quality. Others are a little more fragile; they need a bit more of a tender caring touch.

And so different carpets require **different kinds of cleaning**.

Some can handle a vigorous clean, others need a gentler touch. And even within the same carpet itself, the kind of cleaning required is dependant on the condition of the specific areas of the carpets themselves. Worn-down carpet caused by high traffic areas may require a different cleaning strategy than those areas that are more pristine.

But regardless of the carpet type, regardless of the stain, we can handle it. Every carpet clean is unique and we are your **carpet cleaning experts**.

## Upholstery Cleaning

Most of us don't really give our **furniture and upholstery** much of a thought in regards to how clean it is. As long as its comfortable, that's all most of us care about. We may give it a once over with the vacuum every now and then, or perform a spot clean whenever we've noticed we've spilled food or drink on it, but never much more than that.

If you really knew what still remained on your furniture or upholstery after your vacuum, you'd probably never ever sit on your couch again. Dust mites, layers of dead skin ... dirt, and bacteria.

Our upholstery cleaning service will get rid of all of that stuff that you don't want to think about, and leave your furniture and upholstery looking, feeling and, yes, smelling new again.

## Commercial and Corporate Cleaning

We don't only do **domestic jobs**; we are also available to work on **commercial and corporate jobs**. So, if you work in an office building or a hotel or any other business, and you are in desperate need of a carpet clean to revitalize your look, or to eliminate the spread of germs and cut-down the spread of dust-born allergens, give us a call.

We are highly skilled, and offer a premium service, using only the latest, environmentally-friendly products, and most up-to-date cleaning methods, all catered towards producing jaw-dropping results. We will endeavour to respond quickly to your call, and will work around your schedule.

All of our services listed above and below are available to both Commercial and Corporate businesses, as well as personal households.

### Tile and Grout Cleaning

It is not only carpets that can collect dirt and stains over years of heavy traffic and little cleaning. Your tiles and grout are also great candidates for harbouring germs and bacteria. And since tiles and grout are often used most in **bathrooms** and **kitchens**, having a build up of germs, **bacteria**, mold and **mildew** at your feet is a sure way of causing sickness in those of our more-at-risk family members, our children and old people.

Call our team of technicians, and we will restore your tile area to their original dazzling shine in no time.

### Rug Cleaning

Even if you do not carpet the entirety of your floors, you will probably have **decorative rugs** to add colour and character to your homes. And like carpets, rugs too come in different materials and styles and each style requires different cleaning solutions to ensure they remain soft and colourful.

We clean all types of rugs – think Oriental, Persian, Handmade Rugs, Shag Rugs and many more. Call us for all of your rug cleaning needs.

### Stains and Odour Removal

We all make mistakes. We knock over a glass here, drop some food there, and we find a **stain** on the carpet. We don't want the stain to be permanent, so we get a rag and try and clean it up. However, we just seem to make it worse.

Or we have **pets**, and after a little while, we notice a **smell** remaining even when the pet has gone. We don't know where it's coming from, and we don't know how to get rid of it, but we know it's gotten into the carpets and with every step, we're just trampling the problem deeper into the carpet fiber.

You don't need to hold your breath or worry over spilt milk (or red wine). We have specialised chemical treatments created to attack the components that make up the source of the stain or smell and remove it, leaving your carpet looking fresh and smelling like it has just been laid.

## Mattress Cleaning

Experts say we should sleep at least seven hours a night, and of course most, if not all of us, spend these hours on a **mattress** of some kind. All of this time spent in one place means the mattress becomes a really disgusting place, if you look at it through a microscope. Think bacteria, think flaked off **skin cells**, and millions of **dust mites**. Think of the fact that these dust mites are living organisms, and like other living organisms, they ... well, they excrete. In fact, they excrete twice their own body weight.

If you can no longer sleep, thinking about what else might be sharing your bed, call us to clean your mattress for you.

Time is a finite resource, and it is a resource we want to spend with our families and friends, not on cleaning our carpets, furniture, mattress, tiles and grout. But cleaning is important.

The more we use something, the dirtier it gets, and these are things we sleep on, walk on, sit on every day. And we know that what is sometimes hidden in the depths of our carpet, or our furniture and mattress, or on our tiles and grout, can make us sick if we just simply ignore it.

Call us for a quote. We are experienced cleaning technicians committed to providing you expert and prompt service to the highest industry standards.

Do you remember that new carpet smell your house once had? We can bring it back.
